Where science meets style

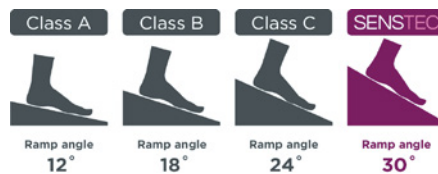

Our research led us to two methods of measuring slip resistance, the Pendulum Test and the Ramp Test, BS 7976-2:2002 and DIN 51097 respectively. We test our product using both standards. With excellent results!

It's all about the dimple

We've worked with the aerospace industry to develop the perfect dimple. A dimple that provides grip without compromising on comfort or cleanability.

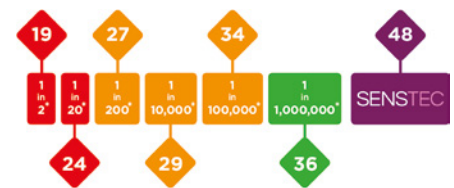

Barefoot ramp test (DIN 51097)

Tray tilted in wet and soapy conditions to 30°.

Pendulum test (BS 7976-2:2002)

A PTV value of 36 = 1 in 1,000,000 chance of slipping!
