Our Rimless Technology

DirectFlush

A perfect design for the highest degree of cleanliness

Thanks to the innovative rimless design, DirectFlush WCs can be cleaned quickly and thoroughly - for quintessential hygiene. It can be hard to clean under the rim of a standard toilet as the toilet brush and cleaning agent do not reach everywhere.

Hygiene

- Easy care and immaculate cleaning thanks to the rimless design
- The total interior of the bowl is completely flushed
- Precise, splash-free flow of water in the toilet right up to the level directly below the rim

Efficiency

- Ideal water flow for maximum flushing effect
- Water-saving, with a flushing volume of only 3 or 4.5 litres

The Champions of Hygiene

The new generation of rimless WCs offers particularly quick and thorough cleaning. A precise, splash-free water flow ensures the entire interior of the bowl is rinsed thoroughly to ensure cleanliness.
